Federal Aviation Administration

Aviation Rulemaking Advisory Committee; Air Carrier Operations Issues—New Task

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of new task assignment for the Aviation Rulemaking Advisory Committee (ARAC).

SUMMARY: Notice is given of a new task assigned to and accepted by the Aviation Rulemaking Advisory Committee (ARAC). This notice informs the public of the activities of ARAC.

FOR FURTHER INFORMATION CONTACT: Quentin J. Smith, Federal Aviation Administration (AFS-200), 800 Independence Avenue, SW., Washington, DC 20591; phone (202) 267-5819; fax (202) 267-5229.

SUPPLEMENTARY INFORMATION:

Background

The FAA has established an Aviation Rulemaking Advisory Committee to provide advice and recommendations to the FAA Administrator, through the Associate Administrator for Regulation and Certification, on the full range of the FAA's rulemaking activities with respect to aviation-related issues. This

includes obtaining advice and recommendations on the FAA's commitment to harmonize its regulations and practices with its trading partners in Europe and Canada.

One area ARAC deals with is air carrier operations issues. These issues involve the operational requirements for air carriers, including crewmember requirements, airplane operating performance and limitations, and equipment requirements.

The Task

This notice is to inform the public that the FAA has asked ARAC to provide advice and recommendation on the following harmonization tasks:

Airplane Performance Operating Limitations

1. Review FAA and JAA airplane operational performance requirements (14 CFR parts 121 and 135/JAR-OPS) and develop a list of differences between the two sets of requirements. (use should be made of preliminary work on the task carried out by industry). During this review, if differences are identified in the associated certification requirements, such difference should be reported to the Aviation Rulemaking Advisory Committee (ARAC) and the Harmonization Management Team by the FAA and JAA contacts.

2. When the first step is completed, explore the feasibility of harmonization of each identified difference in the following order of priority: Performance Class A, Class B, and Class C.

3. Within one year of publication of the ARAC task in the **Federal Register**, develop recommendations for common (harmonized) operational performance requirements for those items identified under item above as being feasible for harmonization. If the working group determines FAA rulemaking is required, that determination must be forwarded to the FAA for consideration of rulemaking priority, resource allocation, and additional tasking to ARAC, as appropriate.

Working Group Activity

The Airplane Performance Harmonization Working Group is expected to comply with the procedures adopted by ARAC. As part of the procedures, the working group is expected to:

1. Recommend a work plan for completion of that tasks, including the rationale supporting such a plan, for consideration at the meeting of ARAC to consider air carrier operations issues held following publication of this notice.
